

5 SIGNS YOUR CHILD MAY HAVE A CAVITY

1. TOOTHACHE

A toothache or spontaneous tooth pain.

2. TOOTH SENSITIVITY

Your child feels sensitivity or pain when he or she eats or drinks something acidic, cold, hot, sticky, or sweet.

3. PAIN

Your child feels a sharp jolt of pain when he or she bites down.

4. VISIBLE HOLES

Visible holes in your child's tooth. Those holes are cavities!

5. STAINING OF TOOTH

Staining (brown, black, or white) on the surface of your child's tooth.

**Call our Pediatric Dentists
(907) 562-1003**

The best time to catch a cavity is in the early stages, when there are few, if any, symptoms.
